Department:  
Education  
**REPUBLIC OF SOUTH AFRICA**

**NATIONAL  
SENIOR CERTIFICATE**

**GRADE 12**

**MATHEMATICS P3**

**NOVEMBER 2009**

**MEMORANDUM**

**MARKS: 100**

**This memorandum consists of 14 pages.**

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 1**

<p>1.1 <math>T_1 = 1;</math>  <math>T_2 = 1;</math>  <math>T_n = T_{n-1} + T_{n-2}</math> for <math>n \geq 3</math>  <b>OR</b>  <math>T_{k+1} = T_k + T_{k-1}</math> for <math>k \geq 2</math>  <b>OR</b>  <math>T_{k+2} = T_{k+1} + T_k</math> for <math>k \geq 1</math></p>	<p>No penalty for leaving out <math>n \geq 3</math></p> <p>If they use any other recursive formula, follow it through.</p>	<p>✓ <math>T_1 = 1, T_2 = 1</math> (both must be correct)                  ✓ <math>T_n = T_{n-1} + T_{n-2}</math> (2)</p>
<p>1.2 1; 1; 2; 3; 5; 8;                  13; 21; 34; 55; 89; 144; 233</p> <p>144 + 233 = 377                  The next number in the sequence is 377.</p>	<p>Answer only: 3/3</p> <p>If sequence is nonsense and comes out with 377, then max 2 / 3</p> <p>If generate numbers and make mistake, then max 1 / 3</p>	<p>✓ 13 ; 21; 34; 55; 89 ;                  144; 233                  ✓ 144                  ✓ 377 (3)</p> <p>[5]</p>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 2**

**Provided the argument is logical, we need to take heed of it.**

<p>2.1 Number required = 240 learners</p>	<p>✓ answer (1)</p>
<p>2.2 No. The sample of 240 learners indicates that the views of a substantial number of learners will be taken into account (20% of the sample). However, whilst this is the case, it is of paramount importance that the sample must be representative of all the learners at the school; otherwise the results of this survey will be invalid. Therefore the sample size alone does not guarantee a valid result from a survey.</p> <p><b>OR</b></p> <p>Yes. Sampling method according to Nandi’s method.</p> <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>Marks go for motivation of yes or no. If just answer yes or no, then 0 / 2</p> </div>	<p>✓ substantial number (20%)</p> <p>✓ representative sample (or any other logical argument) (2)</p>
<p>2.3 Yes.</p> <p>In Nandi’s case the sample will definitely have learners from different grades. Therefore the views of learners from grades across the school will be taken into account. However, in Sam’s method, there is no guarantee that learners from all grades will be selected. The sample in Sam’s case could be biased towards a particular grade or learners of the same age.</p> <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>If only answer Yes, 1 / 2</p> </div>	<p>✓ yes</p> <p>✓ answer (2)</p>
<p>2.4 In the composition of the sample no consideration was given to the number of boys and girls to be selected.</p> <p>Number of learners per grade.</p> <p>Extra curricular participation</p>	<p>✓ any ONE answer (1)</p> <p><b>[6]</b></p>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 3**

<p>3.1</p> <p>3.2</p> <p>3.3</p>	<p>100 – 15 = 85 and 100 + 15 = 115. Therefore the interval between 85 and 115 lie within one standard deviation on either side of the mean. For the normal distribution, approximately 68% of the data lies within one standard deviation on either side of the mean.</p> <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>Accept the answers from 66% - 68% as a range You need to follow this through for the next questions.</p> </div> <p>The score of 115 lies at one standard deviation distance to the right of the mean. Approximately 34% of the data lies in this interval, (one standard deviation). The score of 130 lies at two standard deviations to the right of the mean. Approximately 48% of the data lies in this interval (two standard deviations). Therefore, 14% of the scores should lie between 115 and 130. This translates to 14% of the members of this gym being classified as fit.</p> <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>If end up with 28% then 1 / 2 Accept range from 14% to 14,2%</p> </div> <p>The score of 130 lies at two standard deviations to the right of the mean. Approximately 48% of the members should fall into this interval. Therefore, 2% of the members lie in the region above the score of 130. 2% of 500 = 10 members would be above 130.</p> <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>If use 2,5% then the answer is 12,5. Accept 12 or 13 members as the answer. If candidate leaves answer as 12,5 members then max 1 / 2</p> </div>	<p>✓one standard deviation ✓68% (2)</p> <p>✓ argument ✓ 14% (2)</p> <p>✓ 2% or 2,5%</p> <p>✓ 10 members (2)</p> <p><b>[6]</b></p>
----------------------------------	--	---

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

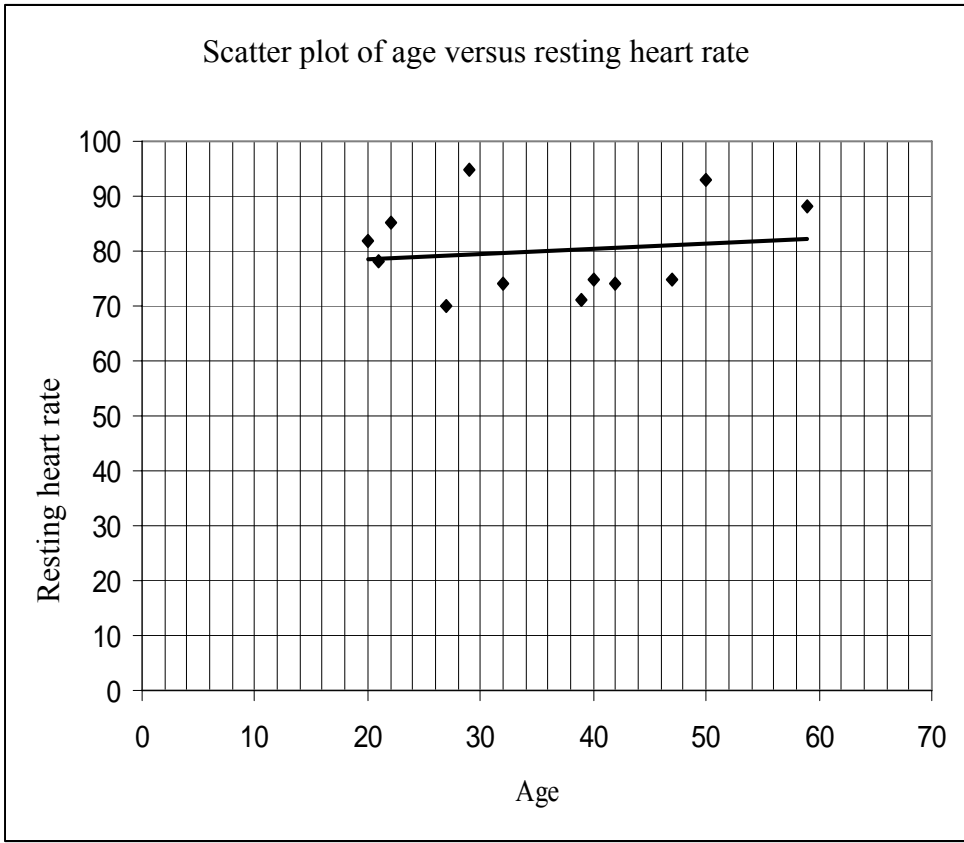

**QUESTION 4**

4.1		<p style="text-align: center;"><b>Outcomes</b></p> <p>(S; RW48hrs) (S; RA48hrs) (S; NR) (I; RW48hrs) (I; RA48hrs) (I; NR)</p>
<p>✓ First level ✓✓ Second level, Syndicates branch Labels must be on (Recovered within 48 hrs; Recovered after 48 hrs; Never recovered) ✓✓ Second level, Individuals branch Labels must be on (Recovered within 48 hrs; Recovered after 48 hrs; Never recovered)</p>		
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">                 Penalty 1 for every mistake in the second level branch                   No values but tree diagram correct: 4 / 5             </div>		
4.2	$P(S; RW48hrs) = \frac{80}{100} \times \frac{24}{100} = \frac{1920}{10\,000} = 0,192 = 19,2\% \quad (0,19)$	(5)
<b>OR</b>		
	$P(S; RW48hrs) = \frac{4}{5} \times \frac{6}{25} = \frac{24}{125}$	✓ probability ✓ answer (2)
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">                 Penalty 1 for giving correct to 1 decimal place                  Accept 0,19 and 0,192 or with more decimal places             </div>		
4.3	$P(\text{stolen and not recovered}) = \left(\frac{80}{100} \times \frac{60}{100}\right) + \left(\frac{20}{100} \times \frac{4}{100}\right) = 0,488 = 48,8\% \quad (0,49)$	✓ $\frac{12}{25}$ or 0,48  ✓ $\frac{1}{125}$ or 0,08 ✓ answer (3)
<b>OR</b>		
	$P(\text{stolen and not recovered}) = \left(\frac{4}{5} \times \frac{3}{5}\right) + \left(\frac{1}{5} \times \frac{1}{25}\right) = \frac{12}{25} + \frac{1}{125} = \frac{61}{125}$	(3)
<b>[10]</b>		

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 5**

<b>Age</b>	20	21	22	27	29	32	39	40	42	47	50	59
<b>Resting heart rate (beats per minute)</b>	82	78	85	70	95	74	71	75	74	75	93	88

<p>5.1 &amp; 5.3</p>	<p style="text-align: center;">Scatter plot of age versus resting heart rate</p> 	<p>5.1                  ✓ axes                  ✓✓ 12 plot points correctly (3)</p> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;">                     Initial value on the y-axis does not necessarily have to be zero.                       Only one mark for plotting 6 – 11 points correct                       Less than 6 correct, no marks for plotting                 </div> <p>5.3                  ✓ line                  ✓ gradient (close to zero) (2)</p>
<p>5.2</p>	<p> <math>a = 76,60</math> (76,5956...)  <math>b = 0,10</math> (0,09544...)  <math>\hat{y} = a + bx</math>  <math>= 76,60 + 0,10x</math> </p> <div style="border: 1px solid black; padding: 5px; margin: 5px auto; width: fit-content;">                     Answer only: 4 / 4                       No penalty for incorrect rounding                 </div>	<p>                     ✓✓ <math>a</math>                      ✓ <math>b</math>                       ✓ equation (4)                 </p>
<p>5.4</p>	<p><math>r = 0,14</math></p>	<p>✓✓ <math>r = 0,14</math> (2)</p>
<p>5.5</p>	<p>The value of <math>r</math> is positive and close to zero. This suggests that there is an insignificant relationship between age and resting heart rate.</p>	<p>                     ✓ positive or not strong                      ✓ insignificant relationship (2)                 </p>
<p>5.6</p>	<p>No.                      The value of <math>r</math> being close to zero suggests that it is not reliable to predict the resting heart rate of a person by using age alone.</p>	<p>                     ✓ No                      ✓ explanation (2)  <b>[15]</b> </p>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 6**

<p>6.1.1</p>	<p>P(students receiving financial aid)</p> $= \frac{6\ 101}{10\ 730}$ $= 0,57$ <div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">                 Answer only: Full marks             </div>	$\frac{6\ 101}{10\ 730}$ <p>✓ numerator ✓ denominator</p> <p style="text-align: right;">(2)</p>
<p>6.1.2</p>	<p>P(postgraduate not receiving financial aid)</p> $= \frac{731}{10\ 370}$ $= 0,068$ <div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">                 Answer only: Full marks                   Also accept: <math>\frac{731}{2610}</math> </div>	$\frac{731}{10\ 370}$ <p>✓ denominator ✓ numerator</p> <p style="text-align: right;">(2)</p>
<p>6.1.3</p>	<p>P(undergraduate receiving financial aid)</p> $= \frac{4\ 222}{10\ 370}$ $= 0,39$ <div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">                 Answer only: Full marks                   Also accept: <math>\frac{4\ 222}{8\ 120}</math> </div>	$\frac{4\ 222}{10\ 370}$ <p>✓ numerator ✓ denominator</p> <p style="text-align: right;">(2)</p>
<p>6.2</p>	<p>Let UG be the event of being an undergraduate and RF be the event of receiving financial aid.</p> <p>P(UG and RF)</p> $= \frac{4\ 222}{10\ 730}$ $= 0,39$ <p>P(UG) × P(RF)</p> $= \frac{8\ 120}{10\ 730} \times \frac{6\ 101}{10\ 730}$ $= 0,43$ <p style="text-align: center;"><b>OR</b></p> $= 0,76 \times 0,57$ $= 0,4332$ <p>P(UG and RF) ≠ P(UG) × P(RF)</p> <p>The event of being an undergraduate and receiving financial aid are NOT independent.</p>	<p>✓ P(UG and RF)</p> <p>✓ <math>\frac{4\ 222}{10\ 730} \times \frac{6\ 101}{10\ 730}</math></p> <p>✓ P(UG and RF) ≠ P(UG) × P(RF)</p> <p>✓ conclusion</p> <p style="text-align: right;">(4) <b>[10]</b></p>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

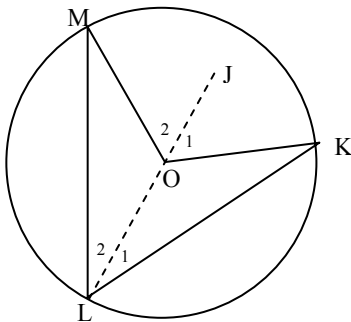

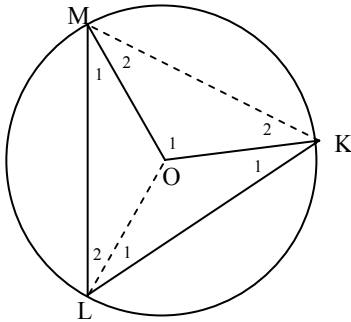

**QUESTION 7**

<p>7.1</p>	<p>Number of ways  <math>= 8 \times 8</math>  <math>= 64</math></p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p>If learner writes all the numbers out and then counts then, full marks Answer will be</p> <p>11 12 13 14 15 16 17 18 21 22 23 24 25 26 27 28              31 32 33 34 35 36 37 38 41 42 43 44 45 46 47 48              51 52 53 54 55 56 57 58 61 62 63 64 65 66 67 68              71 72 73 74 75 76 77 78 81 82 83 84 85 86 87 88</p> <p>64 ways to write a number</p> </div>	<p>✓✓ answer (2)</p> <div style="border: 1px solid black; padding: 5px; margin: 10px auto; width: fit-content;"> <p>If candidate writes <math>8 \times 7</math>: 1/2</p> </div>
<p>7.2</p>	<p>Number of ways for a 4-digit number  <math>= 8 \times 7 \times 6 \times 5</math>  <math>= 1\ 680</math></p> <div style="border: 1px solid black; padding: 5px; margin: 10px auto; width: fit-content;"> <p>Answer only: 3 / 3</p> </div> <p><b>OR</b></p> <p>Number of ways for a 4-digit number</p> $= \frac{8!}{(8-4)!}$ $= \frac{8!}{4!}$ $= 1680$	<p>✓ multiplication rule              ✓ <math>8 \times 7 \times 6 \times 5</math>              ✓ answer (3)</p> <p>✓✓ <math>\frac{8!}{(8-4)!}</math> or <math>\frac{8!}{4!}</math>              ✓ 1680</p>
<p>7.3</p>	<p>Numbers between 4 000 and 5 000  <math>= 1 \times 8 \times 8 \times 8</math>  <math>= 512</math></p> <div style="border: 1px solid black; padding: 5px; margin: 10px auto; width: fit-content;"> <p>Answer only: 3 / 3</p> <p>If leave answer as:  <math>1 \times 8 \times 8 \times 8</math> OR <math>8 \times 8 \times 8</math>: 2 / 3</p> </div>	<p>✓ 1              ✓ <math>8^3</math>              ✓ answer (3)  <b>[8]</b></p>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 8**

<p>8.1</p>	<p>Construct OL and extend to J</p> $\hat{L}_2 = \hat{LMO} \quad (MO = OL)$ $\hat{O}_2 = \hat{LMO} + \hat{L}_2 \quad (\text{ext } \angle \text{ of } \triangle OML)$ $\hat{O}_2 = 2\hat{L}_2$ <p>Similarly <math>\hat{O}_1 = 2\hat{L}_1</math></p> $\hat{O}_1 + \hat{O}_2 = 2\hat{L}_1 + 2\hat{L}_2$ $\hat{KOM} = 2(\hat{L}_1 + \hat{L}_2)$ $\hat{KOM} = 2\hat{KLM}$  <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>If candidate writes: <math>\hat{KOM} = 2\hat{KLM}</math> (<math>\angle</math> circ centre = <math>2\angle</math> at circumference): 0 / 6</p> <p>Note: Construction can be stated or drawn.</p> </div> <p><b>OR</b></p> <p>Join M to K and O to L</p> $\hat{L}_2 = \hat{M}_1 = x \quad (MO = OL)$ $\hat{K}_2 = \hat{M}_2 = y \quad (MO = OK)$ $\hat{K}_1 = \hat{L}_1 = z \quad (OL = OK)$ $\hat{O}_1 = 180^\circ - 2y \quad (\angle \text{ sum } \triangle)$ $2y + 2z + 2x = 180^\circ \quad (\angle \text{ sum } \triangle)$ $2z + 2x = 180^\circ - 2y$ $2(z + x) = 180^\circ - 2y$ $2(\hat{L}_1 + \hat{L}_2) = \hat{KOM}$ $\hat{KOM} = 2\hat{KLM}$ 	<p>✓ construction                  ✓ S/R                  ✓ S/R</p> <p>✓ <math>\hat{O}_1 = 2\hat{L}_1</math>                  ✓                  ✓ <math>\hat{O}_1 + \hat{O}_2 = 2\hat{L}_1 + 2\hat{L}_2</math>                  ✓  <math>\hat{KOM} = 2(\hat{L}_1 + \hat{L}_2)</math>                  (6)</p>
------------	---	--

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

8.2.1	$\hat{R}_1 = x$ ( $\angle$ 's opp = radii) $\hat{O}_1 = 180^\circ - 2x$ ( $\angle$ sum in $\Delta QRT$ ) $\hat{P}_1 = 90^\circ - x$ ( $\angle$ circle centre = twice $\angle$ at circumference)	✓ S/R ✓ $\hat{O}_1 = 180^\circ - 2x$ ✓ S/R $\hat{P}_1 = 90^\circ - x$ (3)
8.2.2	$PQ = QR$ (given) $\hat{Q}RP = 90^\circ - x$ ( $\angle$ opp = sides in $\Delta$ ) $\hat{P}QR = 2x$ ( $\angle$ sum in $\Delta PQR$ ) $x + \hat{Q}_2 = 2x$ $\hat{Q}_2 = x$ TQ bisects $\hat{P}QR$	✓ S/R ✓ Statement ✓ $\hat{Q}_2 = x$ (3)
8.2.3	$\hat{P}QR = 2x$ $\hat{S} = 180^\circ - 2x$ (opp $\angle$ 's of cyclic quad are supplementary) $\hat{O}_1 = 180^\circ - 2x$ $\hat{O}_1 = \hat{S}$ STOR is a cyclic quadrilateral ... (converse – ext $\angle$ of cyclic quad = int opp. $\angle$ ) (ext $\angle$ quad = int opp $\angle$ )	✓ S/R ✓ Statement ✓ Reason (3) <b>[15]</b>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 9**

9.1	$\hat{BCA} = 90^\circ$ ( $\angle$ 's in a semi-circle)	✓ answer (1)
9.2.1	$AC = \sqrt{10^2 - 8^2}$ (Pythagoras) $= \sqrt{36}$ $= 6$  $AM = 3$ (line from circle centre $\perp$ chord bisects chord <b>OR</b> midpoint theorem)	✓ diameter = 10  ✓ AC  ✓ AM (3)
9.2.2	$OM = \sqrt{5^2 - 3^2}$ (Pythagoras) $= 4$ ( <b>OR</b> midpoint theorem) Area $\Delta AOM$ : Area $\Delta ABC$ $= \frac{1}{2} \cdot 4 \cdot 3 : \frac{1}{2} \cdot 8 \cdot 6$ $= 6 : 24$ $= 1 : 4$  <b>OR</b> Area $\Delta AOM$ : Area $\Delta ABC$ $= \frac{1}{2} \cdot AM \cdot OM \cdot \sin \hat{OAM} : \frac{1}{2} \cdot AC \cdot AB \cdot \sin \hat{BAC}$ $= \frac{1}{2} \cdot 4 \cdot 3 : \frac{1}{2} \cdot 8 \cdot 6$ $= 6 : 24$	✓ OM  ✓ substitution  ✓ answer (3) <b>[7]</b>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.

**QUESTION 10**

<p>10.1.1</p>	$\frac{AH}{HE} = \frac{2}{1}$ $AH = 2y$ $HE = y$ $\frac{AE}{ED} = \frac{2}{1}$ $ED = 1,5 y$ $\frac{AH}{ED} = \frac{2}{1,5}$ $\frac{AH}{ED} = \frac{4}{3}$ <p>(GHB    FEC)</p> <p>(BE    CD)</p>	<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;">                 If learner stops at 2 : 1,5 : no penalty             </div>	<p>✓ statement ✓ reason</p> <p>✓ ED = 1,5y</p> <p>✓ answer (4)</p>
<p>10.1.2</p>	$\frac{BE}{CD} = \frac{4}{6}$ $= \frac{2}{3}$ <p>(ΔAEB    ΔADC)</p>		<p>✓ answer ✓ reason (2)</p>
<p>10.2</p>	<p>HE = 2 cm (given)</p> <p>AH = 4 cm</p> <p>ED = 3 cm</p> <p>AD.HE = (AH + HE + ED).HE</p> <p>= (4 + 2 + 3).(2)</p> <p>= 18</p>		<p>✓ AH and ED</p> <p>✓ AD = AH + HE + ED</p> <p>(2)</p> <p><b>[8]</b></p>

- Consistent Accuracy will apply as a general rule.
- If a candidate does a question twice and does not delete either, mark the FIRST attempt.
- If a candidate does a question, crosses it out and does not re-do it, mark the deleted attempt.
