PLEASE READ THE FOLLOWING INSTRUCTIONS CAREFULLY

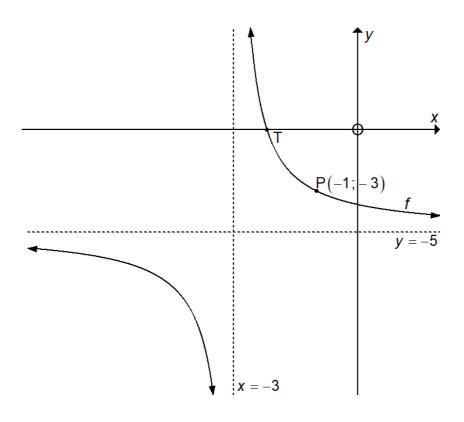

- 1. This paper consists of 24 pages, including two pages with additional space for working. An Information Sheet of 2 pages (i–ii) is also provided. Please check that your paper is complete.
- 2. Write the last three digits of your examination number in the space provided above and answer all the questions on the question paper.
- 3. Please note that diagrams are not necessarily drawn to scale.
- 4. All necessary working details must be shown.
- 5. Round your answers off to **ONE** decimal place unless stated otherwise.
- 6. Approved non-programmable and non-graphical calculators may be used, unless otherwise stated.
- 7. It is in your own interest to write legibly and to present your work neatly.

SECTION A

| (a) | Solve for x in each of the following: | | | | | |
|-----|---------------------------------------|-------------------|-----|--|--|--|
| | (1) | $3^{x}(2x+5)=0$ | (2 | | | |

Round off your answers to 2 decimal digits where necessary.

Malusi decides to buy a car for R245 000. He takes out a loan from the bank for the full amount, repayable monthly over four and a half years. The bank charges interest at 11,5% per annum compounded monthly. Payments start 1 month after the loan is received.

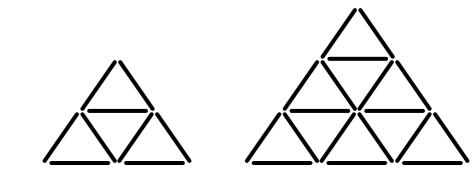

| (a) | Calculate Malusi's monthly instalments. | (3) |
|-----|---|-----|
| | | |
| | | |
| | | |

| (b) | Calculate the outstanding balance at the end of two years, i.e. immediately after | |
| | the 24th payment. | (3) |
| | | |
| | | |
| | | |
| (c) | Making reference to your answer to (b), how much of the total monthly instalment | nts |
| | paid over the 2 year period went towards paying the bank's interest charges? | (3) |
